Skills

- C# | ASP .NET Core | Azure | TypeScript | Angular | Redux | SQL | Git | Azure DevOps | CI/CD | NUnit
- English (B2 British Council Certified) | Polish (native speaker)
- Microservices | Frontend | Backend | Full-Stack

Experience

Software Engineer, Intern

[Medius](#)

Krakow, Poland

06/2024 - 04/2026

- Refactored Azure Hybrid Connection data retrieval for Azure App Service Plans using **C#, .NET, and Azure Resource Manager (ARM) SDK**, improving performance by **42%** through **concurrent API calls** and asynchronous processing.
- Designed and implemented **REST API endpoints** for restarting **Azure App Service WebJobs** using **ASP.NET Core** and **ARM SDK**, resolving ERP data transfer failures.
- Debugged and fixed **frontend and backend issues** in an internal data transfer orchestration system built with **ASP.NET Core, Angular, and TypeScript**.
- Owned **end-to-end feature development** for the **NetSuite ERP Connector**, integrating **NetSuite API** and contributing to onboarding **42 new enterprise clients** over two years.
- Designed and implemented a **global UI and backend services** for starting and stopping ERP data transfers using **C#, .NET, Azure Storage, Angular, and TypeScript**.
- Improved application security by migrating **API keys and secrets** to **Azure Key Vault**, following cloud security best practices.
- Participated in **pull requests, code reviews, unit testing, and integration testing** using **NUnit** and **Git-based workflows**.

Education

- **Master of Engineering (MEng) in Computer Science and Intelligent Systems** | AGH University of Science and Technology, Krakow
03/2025 – 06/2026
- **Bachelor of Engineering (BEng) in Computer Science and Intelligent Systems** | AGH University of Science and Technology, Krakow
10/2021 – 03/2025

Projects

- **OptiSched**: Intelligent meeting scheduling system using genetic algorithms (C#, .NET, Angular). [GitHub](#)
- **Numerical Integration Using CUDA**: Console application for GPU-based parallel numerical integration (C++, CUDA). [GitHub](#)

Profile

Full-stack software engineer with hands-on experience in designing, implementing, testing, and maintaining production systems. Developed a cloud-based integration platform using ASP.NET Core, Angular, and Azure, and delivered end-to-end features in an enterprise ERP environment. Author of an intelligent auto-scheduling web application based on genetic algorithms as a bachelor's thesis project. Currently focused on further development in cloud architecture, backend, and frontend engineering.

Status

Student status valid through June 2026. Available to work up to 60% FTE until June; available for 100% FTE from June onward.

Activities and Interests

Boxing, weightlifting, ice skating, tech content (e.g. Fireship)
